PROFESSIONALSUMMARY

- Dedicated and driven Front end Developer with one year of hands-on experience in web development. Proficient in a wide range of programming languages and frameworks, with a strong commitment to staying updated with the latest industry trends and best practices. Adept at creating responsive and user-friendly web applications, optimizing performance, and ensuring robust security measures. Proven ability to collaborate with cross-functional teams and adapt to dynamic project requirements. Seeking opportunities to contribute my skills and knowledge while continuously expanding my expertise in the field.

EDUCATION

- **Pursuing Bachelor Of Computer Application (BCA) SEM College of Education Computer Science Management Studies & Training (University Of Kashmir)**
- **12th – Govt. higher secondary school Thatharka**
- **10th – Govt. higher secondary school Thatharka**

SKILLS

- **Front End Technologies**: ReactJS, Javascript, CSS, HTML5, NEXT JS, Bootstrap, tailwindcss
- **Web Technologies**: HTML5, REST
- **Repository:** GIT, Bitbucket
- **Methodology:** Agile Methodologies
- **Others**: Jira , Miro CSS, Bootstrap, Tailwind css, , Typescript, npm, Data structures and Algorithms Mongo DB etc.

EXPERIENCE

- ✓ Intern as Front end developer at **Gildware Technologies (July 2023 to present), J&K**

  - o **Technologies Used**: JavaScript, React.js, Next.js, Tailwind CSS, Bit Bucket, Jira, etc
  - o **Role**: Front end Developer
  - o **Responsibilities**: My responsibility is to utilize my skills as Full stack developer in the design, development, testing and Deployment tasks. To understand the core of the project and provide ideas and to implement them for the betterment of the project.

PROJECTS

- ➢ **Issue Tracker website in Nextjs**

  Technologies Used: JavaScript, React.js, Next.js, Tailwind CSS, Mongo DB, Bit Bucket, Jira, JEST, etc.
  Role: Intern Front end Developer

  Description: Created Issue Tracker website using NextJs in which user can create issues and assign issues to the users and user can track issue status from the dashboard. Authentication done by using NextAuth with provider as Google provider. Created APIs for creating, reading, updating and deleting Issues using NextJs api and prisma with MySQL database. Radix-ui and tailwind libraries were used for front end

Deployment: Deployed the Issue Tracker web app on vercel.
